

# John Ford

## Vice President

### Waters Construction

Mr. Ford is Project manager for Waters Construction Co. Inc., with over 21 years of experience in the construction industry. Mr. Ford's experience in heavy civil projects, marine work, building construction, and construction management has provided him with experience in many types of construction projects of all sizes. Mr. Ford assists the estimating department in large scale projects involving different disciplines of work. He is very familiar with the different regulatory and building department codes and requirements and the many different procedures that must be adhered to on these projects. Mr. Ford's expertise in scheduling (Primavera, SurTrak, MS Project), project management procedures, and communications skills has proven to be a successful tool for Waters Construction in undertaking projects of any size or complexity. Mr. Ford works closely with all project engineers and superintendents and coordinates the needs of each project with the various subcontractors and suppliers. Mr. Ford is responsible for all communications with the Owner, Architects and engineers.
